

Security Awareness Training

With 34% of businesses requiring a week or more to recover their data after a cyber-attack and 91% of data breaches starting from a single employee phishing attempt, now is the time to ensure **every single team member** has the resources *AND KNOWLEDGE* to defend your data and reputation.

The average cost of a **ransomware attack** on a business is **\$133,000**

- Avoid budget and brand breaking breaches with CES' Security Awareness Training (SAT).

Data breaches increased 17% in 2021 compared to 2020

- Train staff using automated campaigns, simulated phishing attempts, and more using SAT's realistic attack scenarios and reporting.

There are currently **\$26B annual estimated losses to email scams**

- Decrease cybersecurity incidents by utilizing industry-specific email simulations with SAT's extensive catalog of resources.

46% of organizations had at least one team member **download an infected mobile application**

- Access the world's largest integrated platform for security awareness training with simulated phishing attacks with CES and KnowB4.

A record **97.1m crypto-jacking attacks** took place in 2021

- Equip remote and in-person staff to follow industry-specific regulatory laws and avoid sophisticated data attacks using SAT's fully automated platform.

Don't let one wrong click ruin your business.
